(9) Prescriptive Analytics

Definition: Is the most advanced type. it does not just predict outcomes, it recommends specific actions to achieve the best result. It often uses AI and optimisation models.

Example: A logistics company like DHL might use Prescriptive Analytics to recommend the most fuel-efficient route for each driver based on real-time traffic and weather

(10) Data Literacy

Definition: Data Literacy is the ability to read, understand and work with data. You do not need to be a data scientist you just need to understand what a report is saying and ask sensible questions about it

Example: A marketing manager who reads a campaign report, understands what the conversion rate means, and spots
